

GLOBAL STAINLESS HOSE CLAMPS

- WIDE Stainless Band (9/16")
- No spot welds
- Extra long take up
- Smooth edges
- Interlock construction which strengthens under tension to ensure maximum torque application
- Worm gear clamps are manufactured with the finest stainless steel band and housing for maximum protection against corrosion
- Combination 5/16" hex head and fully slotted screw makes for quick easy installation especially in those hard-to-reach areas.

GLOBAL LINER HOSE CLAMPS

- Specifically designed to prevent damage to silicone rubber hose and other soft hoses under tightening loads while providing full sealing efficiency
- Combo-hex clamp with stainless steel liner prevents hose extrusion and shearing through band notches
- Combined slotted safety collar and hex head screw permit faster and safer installations with screwdriver, nut driver, or socket wrench
- Both liner and screw housing mechanically lock directly to clamp's band to prevent clamp slippage while tightening
- **GLOBAL** liner clamps give the truest concentric seal of any clamp made

BANDING STRAPS & TOOLS

- **Double wrapped, pre-formed clamps** lock securely and require no hammering.
- They easily lock under full tension by one lifting movement.
- Triple locked clamps hold things tightly, securely, permanently.
- Available in Stainless Steel and High Strength Galvanized Carbon Steel.

HEAVY DUTY CENTER PUNCH TOOL for 5/8" wide clamps

PART # J11-135300

LIGHT DUTY CENTER PUNCH TOOL
Portable, inexpensive, easy to use

PART # J11-135038

Wound coils of stainless steel. Highest quality, weather and corrosion resistant strapping with smooth safety edges

Stainless steel buckles can accommodate a single or double wrap of band. Buckles have extremely high joint strength.

Tensioner tool features a spring-loaded gripper lever for more efficient band handling. The cut-off handle is vinyl coated for easier operation.
