GLOBONEL XX

STAINLESS STEEL HEX SOCKET SET SCREWS

Developed exclusively for Tough Maintenance Applications

- MEETS OR EXCEEDS SPECIFICATIONS FOR TYPE 316 Stainless Steel analysis. Provides more corrosion resistance than any other type of stainless steel.
- Special finishing processes eliminate binding, galling and pitting.

- Deeper, stronger sockets for firmer installation, easier removal.
- 125,000 to 145,000 psi
- Non-Magnetic
- Greater tensile strength than ordinary stainless provides greater resistance to stretching, shearing, and snapping.

- Precision formed cup point for maximum holding power, even in severe vibration.

Specially good for maintenance in...

- HOSPITALS
- FOOD PLANTS
- KITCHENS
- HIGH CORROSION AREAS

CLASS C26 - COARSE THREAD
